

Azure OpenAI – ISVs

Unlock the full potential of your software products by incorporating powerful Azure OpenAI capabilities. TEKenable discovers the opportunities for AI and understand the increasing demand for integrating Azure OpenAI technologies into Independent Software Vendor (ISV) products. That’s why we offer our comprehensive Azure OpenAI Integration Service tailored specifically for ISVs.

Our Approach

1. DISCOVER AND EXPLORE

We begin by engaging in a collaborative workshop with your team to explore the potential of integrating Azure OpenAI capabilities into your product. We delve into your requirements, understanding the specific capabilities you wish to incorporate;

2. CUSTOMISED PRICING MODEL

Once we have a clear understanding of your goals, we develop a customised pricing model that outlines the estimated cost and timeline for implementing Azure OpenAI into your product. This pricing model ensures transparency and enables you to make informed decisions;

3. DEDICATED AZURE OPENAI INSTANCE ON AZURE

Upon agreement, we set up a dedicated private and secure Azure OpenAI instance on Azure exclusively for your organisation. This instance is fully optimised to accommodate your requirements and can be further configured and populated with relevant data to ensure it aligns perfectly with your needs;

4. MANAGED API FOR SEAMLESS INTEGRATION

We provide a managed API that acts as a seamless bridge between your software product and Azure OpenAI capabilities. You can easily make API calls from your application whenever you need to leverage the services, eliminating the need to deal with the intricacies of the underlying Azure OpenAI technology.

EXAMPLE:

A common scenario where our Azure OpenAI Integration Service excels is within customer service applications. If you want to suggest automated responses to customer service tickets, our tailored API enables you to request responses specifically for your customers. Simply make an API call, such as “Give me a response to this ticket from my customer,” and our service will handle the rest, delivering accurate and contextually appropriate responses.

With our Azure OpenAI Integration Service for ISVs, you can enhance your software products with cutting-edge AI capabilities without worrying about the complexities. Join the ranks of successful ISVs who have already harnessed the power of Azure OpenAI in their offerings.

Ready to take your software product to the next level?
